

First Anouncement

Encontro de Geometria Brasil-Itália 2012

Incontro di Geometria Brasile-Italia 2012

Brazil-Italy Geometry Meeting 2012

(www.icmc.usp.br/~egbi2012)

To be held at the Federal University of Bahia, Salvador, Bahia, from July 23rd to August 3rd, 2012. The plan of the meeting is to have a first week of mini-courses (7/23/2012 to 7/27/2012) followed by a second week consisting of a research workshop (7/30/2012 to 8/3/2012).

Scientific Committee

Enrico Arbarello (Roma I)
Ugo Bruzzo (SISSA)
Marcos Dajczer (IMPA)
Paolo De Bartolomeis (Firenze)
Eduardo Esteves (IMPA)
Francesco Mercuri (UNICAMP)
Paolo Piccione (IME-USP)
Mauro Spreafico (ICMC-USP)

Local Committee

Diego Catalano Ferraioli (UFBA)
Marco Antonio Fernandes (UFBA)
Luiz Roberto Hartmann Junior (UFSCar)
Daniel Levcovitz (ICMC-USP) (*Coordinator*)
Igor Mencattini (ICMC-USP)
Irene I. Onnis (ICMC-USP)

Brazilian Geometry has a constant presence and strong collaboration with Italian Geometry both in its Algebraic and Differential branches. The main goal of this meeting is to reinforce and stimulate this cooperation even more. We aim to bring together researchers from both countries to promote an interaction that could increase the resources available in both countries through the collaboration and dialogue of experts in the field. In this meeting we plan to:

- ♣ present, through conferences given by renowned researchers in the field, some of the relevant and recent results in geometry and also to strengthen some of the most important research fronts in the field.
- ♣ give students and young researchers the possibility to present and discuss their own results with the community;
- ♣ reserve an ample amount of time for discussion and collaboration among the participants.

We would like to offer the possibility of construction of concrete collaborations between the participants of the event through the possibility of joint research projects that also stimulate young researchers and students of geometry.
